A sketch, diagram, or photos of your property and habitat should be included with your application. You are welcome to attach any other helpful information about your property that would be beneficial to wildlife.

Part of this TREES Backyard Wildlife Habitat Application is adapted from the Backyard Wildlife Habitat Program of the National Wildlife Federation.

Printing for this application made possible by a grant to TREES from the Duke Energy Foundation.

TREES Backyard Wildlife Habitat Program

Application for Certification

Take a walk around your property and consider it from an animal's point of view. To a songbird, a hummingbird, a butterfly, a squirrel, or a chipmunk for instance, would your place look inviting? Is there food, water, cover, and shelter to raise young?

If so, the Environmental Education Committee of TREES is excited to recognize your efforts in providing wildlife habitat where you live, go to school, or work. If you think your property provides a wildlife habitat, please complete this application.

After TREES receives your application, a TREES Volunteer from the Environmental Education Committee will contact you. Once approved, you will receive a personalized framed certificate, and you will be listed as an official member of TREES Backyard Wildlife Habitat Program. If you have any questions about the application or the program, please call the Naturalist at Dobbs Park.

Dobbs Park Nature Center
