The search continues for Big Trees

TREES Inc. keeps a registry of the biggest trees known of each species in Vigo County. Listed in this booklet are those we know of thus far; however, we suspect there are more in Vigo County.

If you have a big tree candidate, please let TREES know by calling Purdue Cooperative Extension Service, 812-462-3371, or by e-mail at contactus@treesinc.org.

**PLEASE do not top trees!**

- Topping is the worst thing for the health of your tree.
- Any tree that is topped is permanently disfigured.
- Topping destroys a tree’s natural canopy.
- It can never recover from topping to grow into a champion tree.

The search continues...

Following the guidelines of the American Forestry Association and the Indiana Department of Natural Resources Big Tree Programs, TREES began in 1992 searching for the biggest trees in Vigo County.

Three measurements are taken per tree. Circumference in inches at 4 1/2 ft. above the ground, height in feet, and one quarter of the average crown spread in feet. The sum of these measurements results in an index number. Trees of each species with the largest index are considered champions. Only native Indiana species are considered. These are trees as defined in Trees of Indiana by Charles Deam, the first state forester of Indiana, and in 101 Trees of Indiana: A Field Guide by Marion T. Jackson, Vigo County’s very own tree specialist.

Please help us register Vigo County’s big trees. This booklet is a representation of those found so far. Measure the tree’s circumference at 4 1/2 ft. above the ground, compare it with the size listed in this booklet, and if it’s bigger or similar in size, please let us know. Notify TREES via telephone at 812-462-3371 (the Purdue Extension Service), in writing at P.O. Box 3683, Terre Haute, IN 47803, via e-mail at contactus@treesinc.org, or on line at http://www.treesinc.org/big_tree_submission.html.
